

# Muhammet Eren Karakuş

Software Engineer · Data & Backend

erenkar950@gmail.com · +90 545 585 2445 · Istanbul, Türkiye · [merenkarakus.com](https://merenkarakus.com) · [linkedin.com/in/muhammeterenkarakus](https://linkedin.com/in/muhammeterenkarakus) · [github.com/eren-karakus0](https://github.com/eren-karakus0)

## SUMMARY

Computer Engineer and 2026 Marmara University graduate, focused on data and backend systems. I have built data-warehouse and ETL / ELT workflows (Oracle Data Integrator, PL/SQL), relational databases and reporting, and .NET and Python backend services. Internship experience at Ziraat Technology, Anadolu Isuzu and AIATUS AI, complemented by full-stack product development and DevOps practice.

## SKILLS

|                  |                                                                                                                                                                |
|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Databases & Data | Oracle, PL/SQL, Oracle Data Integrator (ODI), data warehousing, ETL / ELT, analytic SQL, business intelligence, MSSQL, PostgreSQL, SQLite, Prisma, Drizzle ORM |
| Backend & APIs   | .NET / ASP.NET Core, C#, Node.js, Python (FastAPI), Spring Boot, REST, gRPC, SignalR                                                                           |
| Languages        | C#, Python, TypeScript, SQL, Go, Java, C, Rust, Solidity                                                                                                       |
| Frontend         | React, Next.js, TypeScript, Tailwind                                                                                                                           |
| Infrastructure   | Docker, GitHub Actions (CI/CD), VPS administration, Cloudflare, Nginx Proxy Manager, Redis, Hetzner                                                            |
| AI & ML          | RAG systems, LLM integration, MCP (Model Context Protocol), LightGBM, XGBoost, computer vision (YOLOv8, OpenCV), OCR                                           |
| Blockchain       | Solidity, Foundry, EVM, Wagmi + Viem                                                                                                                           |
| Concepts         | Microservices, Event-driven architecture, Clean Architecture, OAuth, CI/CD, Agile / Scrum                                                                      |

## EXPERIENCE

Embedded Systems & Digital Solutions Intern · [Anadolu Isuzu Automotive Industry](#) Sep 2025 – Jan 2026 · Istanbul

- Delivered a production-grade **Automotive Log Monitoring Platform (.NET)** with real-time telemetry visualization and **AI/RAG-based question answering** for fault diagnosis; planned for fleet-wide deployment at Anadolu Isuzu.
- Built **SignalR** push pipelines for real-time dashboards and **OTA update orchestration (FOTA & SOTA)** for remote firmware and software deployment across vehicles.

AI & Data Engineering Intern · [AIATUS AI](#) Aug 2025 – Sep 2025 · Remote

Built end-to-end applications combining Python / FastAPI backends (JWT auth, REST APIs, Docker) with React frontends; developed SQL Server data-integration workflows (OAuth2, scheduled syncs, data-warehouse connectivity) and contributed to computer-vision and OCR / document-processing pipelines across multiple internal projects.

Online Intern, QNB 101 Program · [QNB Turkey](#) Feb 2025 – Mar 2025 · Remote

Completed banking-technology, financial-software-systems and career-development tracks; connected with industry professionals across QNB's tech organization.

Web Development Program · [Acunmedya Academy](#) Oct 2024 – Feb 2025 · Remote

Full-stack web development with .NET / C#, layered architecture and enterprise design patterns; shipped practical applications through the program.

Data Warehouse Management Intern · [Ziraat Technology](#) Jul 2024 – Sep 2024 · Istanbul Financial Center

- Designed **ETL / ELT pipelines** with Oracle Data Integrator (ODI) for bank-scale data-warehouse workflows at the Istanbul Financial Center.
- Authored and tuned **PL/SQL and SQL** for query optimization, performance improvements and automated enterprise data flows over large historical datasets.
- Deepened **Oracle Data Integrator 12c, analytic SQL for data warehousing and business intelligence** through hands-on labs and self-study.

## VENTURES & PRODUCTS

---

**PanoptesLabs** ([panoptes.cc](https://panoptes.cc)) : Monitoring and intelligence platform - endpoint health scoring and anomaly detection exposed through REST, GraphQL and SSE APIs with multi-tenant workspaces; ships the `republic-sdk` TypeScript SDK on npm.

**KitelD** ([kiteid.xyz](https://kiteid.xyz)) : Naming and delegable identity service - audited smart contracts plus a full-stack application with on-chain indexing and self-hosted infrastructure.

**Forja** ([forja.fun](https://forja.fun)) : Non-custodial token toolkit - audited smart contracts and a Next.js application with wallet integration on the Tempo network.

**Forsety** ([forsety.xyz](https://forsety.xyz)) : Proof layer for licensed AI data - a cryptographic receipt for every dataset access, built as a TypeScript monorepo with an MCP server.

**Unicity - Machine Economy Apps** : Three TypeScript full-stack applications on the Unicity Sphere SDK - an agent marketplace with peer-to-peer escrow settlement and MCP integration ([agent-bazaar](#)), a provably-fair game engine with an autonomous settlement agent ([arcade-house](#), selected and published by the Unicity team on the official Sphere platform), and an autonomous agent-matchmaking app ([Sparks](#)). pnpm monorepos deployed with CI.

**PUSU** : Alarm-to-execution trading engine on the BULK exchange, written in **Rust** - pre-signs a full order once and executes automatically on trigger, with explicit exchange-native vs watcher-side failure-mode design.

## SELECTED PROJECTS

---

**Automotive Log Monitoring Platform (.NET)**. Production enterprise system at Anadolu Isuzu: real-time telemetry dashboard, AI/RAG question answering, SignalR push updates, OTA (FOTA / SOTA) orchestration.

**Data Warehouse and ETL Development (ODI, SQL)**. Oracle Data Integrator pipelines and PL/SQL tuning for bank-scale warehouse workflows at Ziraat Technology, Istanbul Financial Center.

**personal-ai** (B.Sc. Graduation Project). Privacy-first mobile AI assistant running an on-device LLM; no data leaves the device. React Native + native inference.

## OPEN SOURCE CONTRIBUTIONS

---

Contributor to open-source AI-agent, developer-tooling and infrastructure projects, including NousResearch/hermes-agent, eigent-ai/eigent, open-webui, janhq/jan, crewAI, FlowiseAI, changedetection.io and NginxProxyManager.

## HACKATHONS

---

Solo participant in AI-agent and developer hackathons, including **Nous Research** (hermes-agent), **Encode Club** (KitelD) and **AppsFactory Canton Network**.

## EDUCATION

---

**Marmara University, Faculty of Technology**, Computer Engineering, Bachelor of Science · *Graduated June 2026* · Istanbul

## LEADERSHIP & ACTIVITIES

---

Chair, Events Committee · [MÜSAK, Marmara University Social Activity Club](#) · [@musosyalaktiviteler\\_](#)
